and Catering Technology

Report on Disaster Management Session conducted by
National Disaster Response Force

on

24th January, 2020

The National Disaster Response Force (NDRF) is an Indian specialized force constituted "for the purpose of special response to a threatening disaster situation or disaster" under the Disaster Management Act, 2005. force for disaster response related duties, under the unified command of DG NDRF.

Awareness and preparedness campaigns are key components of proactive approach on disaster management. In case of any disaster, the local population is the actual first responder. It may take some time for the district or state administration to mobilise rescue teams, including police and fire personnel, taking this in to consideration Shri Balasaheb Tirpude College of Hotel Management and Catering Technology with NDRF organised the live Disaster Management drill for student. The aim objective of this session was to sensitised the student about the precautions and preventive actions to be taken in case of any calamity, the loss of life and damage to property can be drastically reduced. As, one of the most important tasks of NDRF is to continuously engage themselves in the community capacity building and public awareness programmes, which includes training of people (the first-responders) and concerned government officials at different levels in the areas with high vulnerability. Along with community capacity building and public awareness exercises, NDRF is also actively engaged in area familiarisation exercises. Such exercises provide first-hand knowledge about the topography, access route to various disaster-prone areas, and the availability of local infrastructure/logistics which can be used in disaster response operations.
